

# FADE OUT THINNER 5410

Fade Out Thinner Aerosol

# FADE OUT THINNER 5410

MaxMeyer, the brand close to the repairer, has developed a new product to increase productivity in the bodyshop. In addition the Fade Out Thinner 5410 is a flexible product, as it is especially designed for application on Premium UHS Duralit Topcoats and High Solid Clears, but can also be successfully used on all MaxMeyer solid colors and topcoats.

Its aerosol package brings additional benefits to the repairer, as it is ready for use, immediately available with no need to activate, thin or pour into the gun, and without any leftover of product.

## The key product features are:

- Easy and simple fade out process for all types of repair.
- Ready for use product, and erases the preparation times.
- The aerosol package allows faster process (no waste of time for gun cleaning) and higher productivity (no waste of activated product.)

This new product launch reflects MaxMeyer's position of offering good performing, high quality and user friendly products, and it is 2007 VOC compliant - tomorrow's solution available today!
