High productivity is
AN EXPERT'S BUSINESS.

DISCOVER
THE NEW **HIGH PRODUCTIVITY**
CONCEPT DEVELOPED BY MAXMEYER.

One of the main expectations of a bodyshop manager is to have a faster process cycle that preserves the high quality level of the repair. To meet this requirement, MaxMeyer launched the HP Line several years ago.

Today HP SYSTEM becomes compliant and provides more products specifically designed to obtain the best performance in every phase of the paint process.

Simple, effective and productive.

THE NEW DEDICATED FILLERS: **QUALITY EXPERTS.**

HP Multigrey Filler.

8700 and 8900 are 2K ultra rapid-drying Multigrey Fillers which significantly increase productivity in the bodyshop. By mixing the light grey version (8700) with the dark grey version (8900) together in the correct ratio to achieve the correct shade of grey the opacity of topcoats can be optimised.

- Good filling capabilities.
- Easy to sand.
- Faster drying times compared to conventional primers.

SANDING

HP Multigrey Filler

HP Wet on Wet Primer.

8001 and 8006 are new additions to the HP range. These Multigrey Wet on Wet Primers combine fast process times with an excellent final finish. Developed for use under AquaMax and UHS Duralit Extra, they provide good adhesion over a wide variety of substrates.

- Topcoat can be applied after 20 minutes air-dry.
- Multigrey capability
- Robust application properties

Specific for
WET ON WET

HP Wet on Wet Primer

MULTIGREY SCHEME

Both the sand and the wet on wet primers are available as Multigrey Systems. An undercoat with the proper shade of grey facilitates colour matching and reduces the number of visits necessary to reach opacity; this is a generally accepted fact. MaxMeyer Multigrey System offers 5 shades of grey developed to perform with any topcoat colour.

M1 (100/0)

M2 (70/30)

M3 (50/50)

M4 (30/70)

AEROSOL PACKAGE. **UNBEATABLE SPEED.**

EASY AND FAST
application

HP Aerosol Primer

HP Aerosol Primer is ideal for rub-throughs prior to the application of colour and for small repairs. Thanks to the aerosol package the product is ready for use, minimising the time wasted on the mixing of product and the cleaning of equipment during the painting process.

An average application of HP Aerosol Primer is completed in less than 60 seconds.

- Fast process time. Can be re-coatable with all topcoats after 15 minutes.
- No wastage. Only the necessary amount of product for the repair is used.
