

D8135 UHS Rapid Clear D8714 Catalyst Thinner

High Solids 2-Pack Acrylic Clearcoat
and Catalyst Thinner

New 2 pack
clearcoat.
Designed for the
rapid repair of
small areas.

- Fast process times for small repairs
- Simple & easy application
- Utilises same hardeners & thinners as Deltron Progress UHS DG
- Excellent gloss finish over Envirobase basecoat

Make it happen. With PPG

D8135 UHS Rapid Clear D8714 Catalyst Thinner

High Solids 2-Pack Acrylic Clearcoat
and Catalyst Thinner

Fast and easy to use compliant clearcoat

D8135 Clearcoat is a new compliant clear designed for small repairs of 1 to 3 panels delivering an excellent gloss finish in a fast process time.

Fast process time and quality finish

D8135 has outstanding application properties resulting in a superb high gloss finish.

Optimised for use over Envirobase basecoat, D8135 is also flexible enough to be used over rigid plastic components.

Delivering a fast process time, D8135 also provides good durability. The process time can be further enhanced with the addition of D8714 Catalyst Thinner.

Key Benefits

- 15 minute bake schedule ensuring maximum productivity
- Rapid 10 minute bake schedule at 60°C when used with D8714
- 1 visit application, offering increased productivity and less material usage than MS clearcoats
- Can be used direct over rigid plastics
- Utilises same hardeners & thinners as Deltron Progress UHS DG
- Good flow from the gun ensures a high standard finish, minimising the time spent polishing
- High gloss finish ensures good customer satisfaction leading to repeat business
- Full range of texturing and matting options giving greater ability to match all OE finishes

The launch of D8135 UHS Rapid Clear and D8714 Catalyst Thinner strongly supports the commitment of PPG to refinishers and reinforces its position as a World Leader in Automotive Finishes.
